\$2.00 A YEAR IN ADVANCE

CARBON SCHOOL JUNE PROMOTIONS

Grade IA, Promoted to Grade II
Betty Willson, Ralph Atkinson, Pauline Schoeppe, Ellen Hedberg, Margaret Csepe.

Grade IB, Promoted to Grade II
Mary Mayers, Helen Csepe, Lillian Dixon.

Promoted to Grade IA
Zena Trumbley, Boleck Sobyski, Duncan Code, Lawrence Trepanier.

Grade IC, Promoted to Grade IB
Olusia Kalapowser, Marion Torrance, Jessie Skerry, Evelyn Cox, Lena Reid.

Grade IIA, Promoted to Grade III
Margaret Wheat, Isobel Gouldie, Jimmy Gouldie, Elaine Torrance, Harvey Barker and Doris Gauletz, tie; Bill Code, Elwood Kaehn, Mae Moore, Milly Hunt, Bernard Moore.

Grade IIB, Promoted to Grade III
Albert Bramley, Robert Ramsey, Billy Heath, Gordon McGregor.

Promoted to Grade IIA
George Moore, Annie Shyja, Mary Shyja, Billy Rogers, Annie Lemay, Lucille Lemay, Victor Kaehn.

Absent for tests, Irene Grenier.

(Miss) Kate Ramsay, teacher

Grade III, Promoted to Grade IV
Mabel Fuller 89, Ernest Fox 87, Gladys Bramley 82, Jean Skerry 79, John Rogers 77, Cecil Trumbley 76, Jack Heath 73, Raymond LeMay 69, Harold Wise 62, Zona Fairbairn 59, Elmer Wolfe 54, Francis Poxon 54, Betty McQuade 53.

Grade IV, Promoted to Grade V
Roy James 77, Marjorie Martin 70, Stanley Ramsay 69, Agnes Skerry 66, Sydney Bramley 65, Robert Wise 59, Sammy Malton 55.

Grade V, Promoted to Grade VI
Billy Oliphant 73, Fergus Greenan 72, Finlay Code 72, Lee McEntire 68, Betty Code 67, George Jealous 66, Bill Graham 61.

(Miss) M. KENNY, teacher

GAMBLE SCHOOL PROMOTIONS

Promoted to Grade 3—Verna Congo, John Gordop, Dorothy White, Katherine Hay.

Promoted to Grade 4—George Congo 77, George White 77.

Promoted to Grade 5—Willie Gibson.

Promoted to Grade 6—Charles Gordon 86, Elma White 78, Wilfred White 65, Milton Jennings 64.

Promoted to Grade 8—Dorothy Hay 83, Jean White 83, Florence Gibson 81, Grace Phillips 80, Olive Phillips 78.

Perfect attendance Dorothy Hay.

E. M. IRWIN, Teacher

38 POUNDS GAS PRESSURE AT WELL

Drilling was continued last week at the gas well of the Carbon Exploration Company and after the drill had gone to a depth of 680 feet Saturday morning a large gas flow was struck. Drilling was suspended immediately and a pressure gage was put on the well to see just what pressure was there. The result was that the gage showed a pressure of 37½ pounds. On Saturday evening people of Carbon and surrounding district were notified that the gas in the well would be lighted in order to see what flame would result from the gas obtained. Over 50 cars were at the site of the well and when the gas was lighted the flame shot clear to the top of the drilling machine, an estimated height of 35 feet. On account of danger to the equipment from fire the flame had to be extinguished and the gas piped through a smaller pipe away from the drilling machine. The force here was so great that when the gas was turned on full pressure it would extinguish the flame. It is estimated that this flow of gas is sufficient to heat 300 homes.

As a result of this gas flow, another well will be drilled north of the present location to further test the structure.

A number of the Carbon people attended the baseball game at Drumheller on Sunday. The Texas Colored Giants played a team composed of the best players on the Drumheller and Rockyford teams.

SPORT NEWS

BEISEKER WINS FROM CARBON

Another game in the Carbon-Irricana-Beiseker-Acme baseball league was played at Carbon on Wednesday night last between Beiseker and Carbon, the former team winning by a score of 6-1. The Carbon boys put up a better game than they did previously and we wish them success in their forthcoming games.

CARBON HIGH SCHOOL DEFEATS ACME HIGH SCHOOL

The Acme High School baseball team came to Carbon Friday evening to play baseball with the Carbon High School team. The score was close, although the Carbon boys had the edge of the game all the way through, and the game ended 5-3 in favor of the local team.

Following is the line-up of the Carbon team: Leo Trepanier c; Nelson McClure p; Harold Edwards 1b; Wilfred Poxon 2b; Bud Morrow ss; Geo. Ives 3b; Jack Code rf; Norman Nash cf; and P. Dodyk lf.

CARBON GOLFERS PLAY AT DRUMHELLER

The Carbon Golfers playing over the Drumheller Golf Course on Sunday last were: Messrs. A.F. McKibbin, F. Bessant, G. G. Peters, E. J. Rouleau, W. Edwards, J. J. Greenan, Len Poxon, Stan Carney and W.M. Smith. Most of the Carbon players could not seem to navigate the watery course of our neighboring town and as a result the local golf ball dealers have been doing a rushing business this week. Only a friendly match was played and no scores are available for press reports.

Next Sunday the Drumheller Club will visit the Carbon Golf Club for a return match and the local enthusiasts are asked to be on the course to compete in the match.

CARBON LOSES TO BIG BEND IN FOOTBALL GAME

The championship for the Trochu Inspectorate High School Football was won by Big Bend School on Saturday afternoon last, when that school played the Carbon High School team at Trochu. The game ended 4-2 in favor of the Big Bend boys, giving Carbon second prize in the match, which included teams from Trochu and Acme. The second prize is a regulation football.

The following boys comprised the Carbon football team: Bud Morrow, Pete Dodyk, Paul Fuller, Cyril Poxon, Wilfred Poxon, Leo Trepanier, George Ives, M. Wiertz, H. MacDonald, Frank Emery and Jack Code.

LITTLE ITEMS OF LOCAL INTEREST

Mrs. Wm. McNichol spent a few days in Calgary last week.

Mrs. J. A. MacDonald left yesterday for Medicine Hat to visit with her parents.

Mr. and Mrs. Emil J. Ohlhauser motored to Wetaskiwin last week, taking in Pigeon Lake, Battle Lake, and Sylvan Lake on their way home.

The Innis Private Nursing Home, 921-18th Ave. W., Calgary Alberta. Excellent care for aged people, chronic, or waiting cases. Telephone W-2710.

The Carbon W. A. will hold a Strawberry Social in the old Frisco store on Saturday, July 5th, from 3:00 p.m. to 12:00 p.m.

Mrs. H. A. Wiertz and family have moved into Calgary to reside.

Jos. Connolly, principal of the Carbon school, leaves today for Edmonton, where he will be employed for the next couple of weeks marking Literature examination papers.

E. J. GARLAND IS U.F.A. CANDIDATE FOR DOMINION

E. J. Garland, sitting member for Bow River federal riding, was the unanimous choice of the U.F.A. convention held in Calgary on Thursday last week, as candidate for the same riding in the forthcoming federal election. Mr. Garland has represented Bow Valley for the past nine years and has taken an active part in Dominion Government affairs.

A number of Carbonites spent the holiday picnicking at Pine Lake.

CHAS. SCHMIDT IS KILLED, LIGHTNING

Chas. Schmidt, well known in Carbon and to the south, was killed near Rockyford on Thursday last, when he was struck by lightning. The lad, who was only 18 years old, was working in the field before the storm and on the approach of rain neighbors heard the tractor which he was operating, cease working, and they were of the opinion that he was returning home. When he did not return in the evening a search was made for him and the body was found near his car, where it had fallen. On examination it was found that death was caused by lightning.

Funeral services were held from the First German Baptist Church, near Carbon, on Saturday afternoon, and a large number of friends and relatives were present to pay their last respects to the deceased.

Local News Items

Mrs. W. Sulter and young son visited at the home of Mr. and Mrs. T. J. Ramsay over the week end. They returned to their home in Calgary on Tuesday.

Mr. and Mrs. S. Tighe of Didsbury, visited at the home of Mr. and Mrs. H. N. Elliott over the week end.

Miss Kate Ramsay left Sunday morning to spend the summer holidays in Calgary.

Mr. and Mrs. Clayton Knisely and son left last Thursday by car for Kansas City, where they will reside in future.

Miss M. Kenny who has been on the teaching staff of the Carbon school for the past year, has resigned her position and she left for her home in Calgary on Friday last.

We understand that Mr. Bruce Ramsay has accepted a position on the staff of the Carbon Public school for the next term.

W. Anderson left Tuesday for Hughenden, after spending a few days visiting here with his mother and brothers.

D. A. McCannell of Calgary spent the week end in Carbon in connection with the drilling of the gas well on the leases of the Carbon Exploration Company.

C. W. Gray has purchased the "Hopp Inn" building from C. H. Nash and this week workmen have been busy moving the structure to Mr. Gray's lot between W. A. Braisher's store and the present location of Mr. Gray's Hardware store.

GRAND FORKS NEWS ITEMS

The Grand Forks baseball team played the Ghost Pine team on the latter's ground last Tuesday evening. R. Garrett and A. Johnson pitched a good game and were well supported by the rest of the team, the result being a win for Grand Forks 12-6.

A picnic was held on Friday afternoon by the Webb School at the Grand Forks grounds. There were over 100 people present. Several events were held including foot races for the young and old, peanut and potatoe races and tie races. A high jump contest was also held.

The ice-cream and soft drink booth which was under the able management of Mrs. Hempseed was well patronized. All the children present were given tickets for free ice cream and the first three in every race and other events were also given a free choice of either soft drinks, chocolate bars or ice cream.

Supper was held at five o'clock and was greatly enjoyed by all. After supper the main event of the day was held. This was a soft ball game between the Grand Forks and Swallow ladies teams. Grand Forks won with a score of 23-18.

The teams were: Grand Forks, Mrs. C. Anderson, M. Gray, G. Guynn, C. Wright, Mrs. R. Anderson, E. Guynn, Mrs. Castella, M. Craddock, G. Maxwell, G. Craddock, Mrs. M. Anderson, G. McCracken, I. Mayes.

Swallow: Mrs. Tricker, Mrs. Hunter, Mrs. Hingle, Mrs. E. Tricker, A. Wolff, L. Basset, B. McIntyre, I. Empey, M. Young, V. Gore, Umpire, F. Tricker.

After the match a dance was held in the Webb school, thus ending a very enjoyable day.

RICHARD DIX COLOR FILM IS NEW SCREEN EPIC

A love theme as tender as the story of Romeo and Juliet, enacted against the majestic background of the little-known American Southwest with all the brilliant coloring and beauty of the country revealed on the screen, will show at the Carbon Theatre on Friday and Saturday of this week.

It is Richard Dix's new epic of the American Indian, "Redskin."

"Redskin" is the drama of a race of people, clinging to old traditions yet seeking to adapt themselves to the new. It is the struggle of youth against the caution of age; of youth seeking release from the chains of tribal custom. It is the romance of a boy and a girl of rival tribes, separated by generations of ill-feeling between their ancestors, who learn to love and rise above the restrictions of their environment.

Richard Dix plays the leading role, with beautiful Gladys Belmont, a newcomer to leading parts, opposite him. Dix has a dramatic role and the picture is a perfect vehicle for him. Hundreds of Indians appear in the picture and some of them play small parts. The cast contains many well-known names such as that of Tully Marshall.

The color effects are marvelously real and beautiful. The scenic backgrounds are inspiring and the gripping drama is well conceived and particularly well acted. It is a new epic of the American screen.

WORLD HAPPENINGS
BRIEFLY TOLD

On June 24, the King and Queen received the delegates to the Imperial Press Conference, in the throne room at Buckingham Palace.

British Columbia expects to benefit from the new Australian tariff just introduced in the Commonwealth House, extending a British preference to lumber.

Mr. Bennett Scott, the song composer whose "Take me back to dear old Blighty" was sung by soldiers all over the world, died at his home at Loraine Mansions, London, England.

Mr. and Mrs. Joe V. Illeneuvre, of Detroit, were burned to death when their airplane fell at the municipal airport, in Toledo, Ohio, and burst into flames.

President Hoover has approved transfer of the obsolete submarine P-12 from the navy to the U.S. shipping board which will charter the craft to Sir Hubert Wilkins for North Polar explorations.

F. E. Beattie, aged 50, an accountant in the Bank of Hong Kong and Shanghai, at Shanghai, disappeared from the "Empress of Russia," it was reported on the steamer's arrival at Vancouver. He was a passenger enroute to Scotland with his wife.

Vincent Massey, retiring Canadian minister to the United States, who delivered the annual commencement address at the University of Michigan, Ann Arbor, was awarded an honorary degree of Doctor of Laws.

L. R. McGregor, new Australian trade commissioner to Canada, arrived at Victoria recently from Sydney with his wife and two children. He is particularly anxious to introduce Australian wines to Canada.

Switzerland Is Prosperous

Has Population Of Over 4,000,000 and People Are Good Workers

Switzerland, which has an area of only 19,950 square miles, has now a population of roundly 4,000,000 to which it has risen from 3,300,000 in 1900. Small as the country is, it has 30 towns of over 10,000 people. While the population has increased the mountainous regions are being deserted. The general growth of Switzerland is the more remarkable for the fact that one-fifth of the whole territory is mountainous and unproductive. Switzerland is almost destitute of native raw materials and yet she has 600,000 persons engaged in productive industry. In fact, it is not too much to say that if all the world worked as well and as effectively as Switzerland, it would be a happier place. Switzerland is never troubled by war or rumors of war.

Canada's Military Force

Consists Of 401 Officers and 1,067 Non-Commissioned Officers

Canada's permanent military force at the present time comprises 3,943 all ranks of whom 401 are officers and 1,067 non-commissioned officers. At headquarters in Ottawa there are nine naval officers, forty-nine military officers and thirty-one air officers. There are also at headquarters a total of 104 other ranks.

Four hundred and forty-three civilians are employed of whom 400 are permanent.

The cost of administering the headquarters totals \$1,425,311 annually.

HOW THE RICH FARMER EQUIPPED HIMSELF AS A PROTECTION FORM MOTOR-ACCIDENTS IN THE CITY.—Lustige Sachse, Leipzig.

W. N. U. 1844

Many Accidents Caused
By Neglected Cars

Carelessness Allows Defects To Develop In Mechanical Parts

Automobile owners in the United States who neglected to keep their cars in good condition were responsible for five thousand of the lives lost in traffic accidents during the last calendar year. This estimate is made by the framers of the report recently submitted to the National Conference on Street and Highway Safety at Washington, by its committee on the maintenance of motor vehicles. To learn that fully fifteen per cent. of the traffic fatalities recorded in 1929, are actually traceable to lack of proper care of cars is an enlightening disclosure. The studies of the committee into causes of motor accidents have convinced its members that stricter official inspection of all automobiles is urgently needed.

Essentially this report charges that because of improper maintenance defects are allowed to develop in vital mechanical parts of a car; brakes and steering gear are allowed to become dangerously worn or drop out of adjustment; horns, windshield wipers, rear lights and headlights uncared for become ineffective. A steady increase in driving speeds in the last few years has served only to increase the hazards created by the negligence of those who own cars and permit them to be operated when they are unfit to be driven on public highways. The committee recommends legislation that will enforce periodic inspection in States where such a precaution is not now taken. It suggests that in the case of old cars that have been resold several times a certificate of inspection should be required when drivers' licenses are issued.

Pulsating Stars

Theory Advanced That Certain Stars Do Not Rotate

A theory that certain stars do not rotate, is presented to the American Association for the Advancement of Science, by Dr. Ross-Gunn, of the Naval Research laboratory. These non-rotating stars are those which pulsate, that is, which expand and contract. Some of the pulsating stars have the habit of enlarging their diameters millions of miles. They beat like vast fairy hearts.

One class of pulsating stars, the Cepheid variables, are the "light-houses" of the sky, that is, they enable astronomers to calculate the vast distances of space. Dr. Gunn's theory comes from study of magnetic fields about stars, especially those about the pulsating suns.

(By Annebelle Worthington).

Of course our new Summer Fashion Magazine contains all the vacation styles for grown-ups for afternoon, sports and home wear. But we haven't overlooked the kiddies. The two shown here are from the book which contains a large selection of attractive styles for children of all ages for party and general vacation wear. Price 20 cents.

TEN YEARS' GROWTH OF TOURIST TRADE

The rise in the value of Canada's tourist trade during the last ten years has been little short of phenomenal. Estimates of the expenditures made in the Dominion by tourists from other countries run back as far as 1920, and it will be found that during this ten-year period, 1920-29, inclusive, tourists from abroad are estimated to have spent in Canada a total of roundly \$1,682,000,000.

Such a sum of money is almost staggering, and it is difficult to find comparisons enabling us to realize its immensity. Perhaps the most startling comparison that could be made is to place this sum alongside the enormous outlays that Canada was called upon to make in connection with the Great War. According

to the Federal Public Accounts the total expenditure made by the Dominion Government under the heading "War and Demobilization" is placed at roundly \$1,695,000,000.

Thus the expenditures made in Canada by tourists from other countries within the last ten years are estimated at an amount which falls only a few thousand dollars short of equalling Canada's immense outlays for war and demobilization purposes. It is not to be wondered at that the highest financial authorities in Canada have recently made it a special point to direct public attention to the growth and possibilities of this comparatively youthful recruit to the ranks of the Dominion's major economic interests.

Bacon Contest

Summer Bacon Litter Competition To Be Held In Saskatchewan

The Saskatchewan Livestock Branch, with the co-operation of the Dominion Live Stock Branch, is fostering a summer bacon litter competition as a stimulus and a first rate benefit to the swine industry of Saskatchewan. According to J. G. Robertson, Live Stock Commissioner for Saskatchewan, the province will be divided into five parts for the purpose of this contest, over which the prize money will be equally distributed. Among the conditions of entry it may be noted that litters must be farrowed between April 1st and July 1st, and may be out of a grade or a purebred sow, but must be sired by a registered bacon type boar, and at least nine pigs must be raised to marketing age.

The Central Railroad of Peru crosses the Andes at one point at 15,865 feet above sea level.

Trade With Russia

Canada's Exports To Soviet Russia Are On the Increase

"Soviet Russia may be said to be the only country, outside of Germany, in Central Europe which imports direct the bulk of its requirements of Canadian products," writes L. D. Wilgress, Canadian Trade Commissioner in Hamburg, in the "Commercial Intelligence Journal." "Other countries in this territory, such as Czechoslovakia, Austria and Poland, consume important quantities of Canadian goods, but these are usually consigned in the first instance to Hamburg and for this reason appear in the Canadian trade returns among the exports to Germany. Canada's exports to Soviet Russia in 1929 increased by \$1,137,068."

The arctic tern nests 11,000 miles from where it spends its winters.

The simplest element known to man is the hydrogen atom.

Moose Pose for Photo

In the north woods at Metagama, North Ontario, where M. U. Bates runs his camps, moose are unusually plentiful this spring. Mr. Bates was visiting one of the camps the other day and looking in a cabin found two infant moose asleep in one of the bunks. He lifted them out but they came back to the veranda and, finding a sunny spot, had another nap. The moose were quite tame and are here shown being posed for a photograph. The snapshots were taken within a mile of the Canadian Pacific Railway tracks near Metagama.

SUNDAY SCHOOL LESSON

JULY 6

ABRAHAM, A PIONEER OF FAITH

Golden Text: "By faith Abraham, when he was called, obeyed to go out unto a place which he was to receive for an inheritance; and he went out, not knowing whether he went." Hebrews 11:8.

Lesson: Genesis 12:1-5; 13:1-12; 17:1-8; 18:22-33; Hebrews 11:8-10.

Devotional Reading: Psalm 23.

Explanations and Comments

The Call That Came To Abraham, Genesis 12:1-3. — Some inward suggestion or some outward event convinced Abraham (who is called Abram in the early chapters of Genesis), that he was called by God to leave his country, and his kindred, and his father's house (cumulative expressions which show how much Abraham had to lose in obeying the command), and go to the land that God would show him. The goal is definitely stated in verse five as the land of Canaan. The writer of our account did not imagine that God spoke to the outward ear, any more than does the oriental of the present day. "God has spoken to me" is a common Arab phrase today when a man feels a deep impression in his soul. "Under the simple statement 'Jehovah said,' there are probably hidden years of questioning and meditation; God's revelation of Himself to Abraham in all probability passed through the preliminary stages of surmise and doubt and mental conflict. But once assured that God was calling him, Abraham responded quickly and resolutely." — Marcus Dods. He was sure that God had a plan for his life, and he acted upon his belief.

God's call to separation was a necessary condition of blessing. "I will make of thee a great nation, and I will bless thee, and make thy name great"—this is the great thought that runs through the whole book of Genesis. "God can impress us with such a sense of obligation as can only be understood as the will of God; He can inspire us with such sublimity and solemn hopes as can only be understood as promises of God." — James Denny. "And be thou a blessing."

Abraham's Great Adventure Of Faith, Genesis 12: 4, 5.—With Sarah his wife, Lot his nephew, and all his slaves and dependents, and also his flocks and herds, Abraham journeyed to Canaan. He was seventy years old when he left Haran for the land about which he knew so little. "They went forth into the land of Canaan, and into the land of Canaan they came": was there ever a briefer account of a long and dangerous journey? "They started, they arrived—that is all. Well, that is what happens to people who are as capable as Abraham and as decisive in their faith."

Dr. Jowett calls belief the acceptance of a map, while faith is the taking of the voyage. Abraham had belief and faith.

"So I go on not knowing. I would not if I might; I'd rather walk with God in the dark Than walk alone in the light; I'd rather go with Him by faith Than walk alone by sight." David J. Burrell.

A Romantic Province

Colorful Pages Of Pioneer History In the West

The oldest of the Prairie provinces has had a romantic history. It gave birth to the romance of the West with its Red River carts, an association which colors the pages of pioneer history in the West. From what was Fort Garry to what is today Winnipeg, is in itself a monument of a story replete with adventure and achievement. It is the story of early beginnings ending in great accomplishments, with the torch lit by the first pioneers now illuminating a great and prosperous province. July 15 will be a day of great pride to the people of Manitoba with what has been done serving as an incentive to further achievement, with the spirit and zeal of the early pioneers carried on to meet the needs of the modern day.—Lethbridge Herald.

In Czechoslovakia there are fourteen women in Parliament, ten deputies and four senators.

"Were you driving for the first time?"

"No—the last."—Hummel, Hamburg.

BY WAY OF REBUTTAL

(The Toronto Star)

There is a Conservative platform
speaker named G. Howard Ferguson
going about the province making
speeches in which he tells of the blue
ruin which faces Ontario under Liberal
rule at Ottawa. In his speech at
Mountain Ontario, he said:

"Are things prosperous here? In
Toronto thousands are walking the
streets. In Ontario tens of thousands
are idle. There is stagnation similar
to that in the seventies."

This is a black picture. But is this
Mr. G. Howard Ferguson a reliable
witness as to conditions in Ontario?
Let us recall in rebuttal a witness
more reliable than this federal cam-
paign speaker—let us call Hon. G.
Howard Ferguson, Premier of Ontario
who in a speech on September 19 of
last year discussed the conditions of
Ontario to the following effect:

"If you will turn back to 1923 you
will see that the value of the farm
products in the province was about
four hundred millions of dollars. In
1928 it exceeded five hundred millions
of dollars. That is due, Mr. Chairman,
to efficiency in method and more in-
telligence in carrying on the industry,
due to the training that has been

brought about by our educational meth-
ods with regard to that great in-
dustry. Why, the agricultural wealth of
the province of Ontario in the same
period has increased one hundred and
fifty million dollars. Will anybody say
that Ontario is not making rapid
strides? If you will look at the re-
cords you will find that building op-
erations and structural development
in the first six months of this year
(1929) there was invested in Ontario
a record sum of one hundred and sev-
enty millions of dollars. The money
must be available. Our people must
be making progress. Everywhere you
go people realize that there must be
no more prosperous section in any
part of the world than we find in our
own province of Ontario."

There you are! All, we feel sure,
will agree that the Premier of Onta-
rio is a much better witness as to the

state of the province than the federal
stump speaker who moaned dismally
at Mountain, Ont.

**CANADIAN AGRICULTURAL
CONDITIONS**

(From Royal Bank Report)

During the months of June and
July, rapid changes in weather and in
other conditions affecting the western
wheat crop render it difficult to esti-
mate the probable yield. The Domini-
on Bureau of Statistics reported that
the condition of the crops on the 1st
of June was 96 per cent as compared
with the average condition at the same
date during the ten years 1921-1929.
When it is realized that this ten-year
period includes the record crops of
1926, 1927 and 1928, the estimate must
be considered exceptionally favorable.
After the data for this report was

collected there was a certain amount
of damage by wind, frost and cut-
worms. In June, however, there were
heavy general rains and it was hoped
that warm weather would stimulate
rapid growth.

Seeding was completed somewhat
earlier than last year, and early re-
ports indicated that conditions were
satisfactory. The plants had rooted
well, but the cool weather of May re-
tarded growth so that by the tenth
of June the height of the plants was
about the same as at that date in
June 1929. Damage from frost and soil
drifting was reported from all sec-
tions but soil conditions in Manitoba
and Southern Alberta have improved
materially. The soil drifting has done
most damage in southern Saskatche-
wan and Central Alberta. It is stated
that conditions in the Peace River
district have been ideal; seeding was
completed early and there has been
ample moisture; growth has been rap-
id. In all three provinces pasture and
fodder crops have made satisfactory
progress.

It is encouraging to note that grain

in store in western Canada has been
moving to market somewhat more ra-
pidly than in previous months. During
the five weeks ending June 6, the
Canadian visible supply of wheat de-
creased by more than thirty-five mil-
lion bushels; this is at the rate of
approximately seven million bushels
a week. Since that date a number of
large sales have been reported. If the
movement of Canadian wheat contin-
ues at this rate until the end of July,
the carryover into the new crop year
will be less than one hundred million
bushels. In the face of a number of
foreign estimates that the carryover
in Canada would exceed this amount
by something like 50 per cent, the
recent movements may be considered
as good news. Last year the carry-
over amounted to 109 million bushels
and present prospects seem to suggest
that this year's carryover will be sev-
eral million bushels less than that of
last year.

In Eastern Canada, early sown grain
has shown excellent growth. Moisture

(Concluded on Page 5)

Prince Launches Ship

Before an immense gathering, H. R. H. the Prince of Wales launch-
ed the 42,000-ton Canadian Pacific liner Empress of Britain,
largest steamship in the British Empire, from the Clydebank yards,
June 11. The picture, snapped as the huge vessel had just taken
the water, was transmitted to this continent by radio a few seconds
later. Millions of listeners in from all parts of the world heard
the Prince make the address at the launching and also the address
of E. W. Beatty, chairman and president of the Canadian Pacific
Railway, who followed His Royal Highness.

A Golf Course in the Clouds

Itself a mile above sea-level and ringed by
mountains rising another mile into the air, the
18-hole golf course of the Banff Springs Hotel in
the Canadian Rockies is probably unique among
the world's outstanding links. Its hazards are
unparalleled and as an example there is the drive
from the first tee over the foaming waters of the
Spray River, shown in above lay-out. The golf
club house is a very picturesque building in archi-

tectural keeping with the baronial pile of the
nearby hotel, a glimpse of which is shown against
the background of mountains on the second green.
The course which has just been completed, pre-
sented enormous difficulties in making, but these
were all successfully overcome and grounds that
are a perfect pendant to one of the most beautiful
and luxurious hotels on the continent are now at
the disposal of guests.

Canadian and World Progress

The above is the main heading of an article in the current issue of Toronto Saturday Night dealing with the present economic situation. The sub-headings to the article state: "Dominion's Rate of Advancement Far Above Other Nations—Favorably Situated To Share Again In Progress."

Because, owing to the present temporary depression in Canada, as throughout the world, but fortunately less acute in this country than elsewhere, there is a tendency on the part of many people to become unduly pessimistic, it is perhaps well to pass on some excerpts from this very illuminating article in the Toronto paper:

Economic life is ever in a state of flux. The fortunes of nations are affected by some radical change which may raise or lower their status among the powers. Business men find themselves drawn into the current of new demands and competition, through which the most careful navigation is necessary. Even persons in the most humble circumstances and those who for one reason or another are not engaged in active work cannot fail to notice how their living habits are altered over a period of time.

The most recent period of prosperity probably lends itself to more thorough analysis than any other; for one reason, because from the data available we can more accurately measure the forces employed; we can well determine the degree of economic recovery from the most disastrous conflict in history. Ten years ago the receding tide of war influences left a mass of economic disorder. Inflation of credit and currency, severe depression in commodity prices, unstable political conditions, an enormous weight of debt and taxation and serious labor troubles—these were but a few of the difficulties which faced world business.

The economic forces of the world were finally mobilized along the broadest front ever occupied by an army of workers. The ensuing advance was not uniform the world over; the United States, Canada, France and Argentine swept ahead of other countries, but progress was made almost everywhere on the globe, and in this period of intense economic activity world production reached a record level.

An analysis made by the Canadian Bank of Commerce bears out this statement. An interesting sidelight in that analysis is a comparison between the progress of Canada and that of the world as a whole. It should not be taken for granted that Canadian production of basic commodities exceeded that of every other country, but it is a proven fact that the rate of increase in Canadian production exceeded that of the world by a wide margin in many of the most important branches of economic life.

This advance of Canada was so rapid as to place her among that small group of nations which enjoys a highly diversified economic organization, and one which has a broad field of opportunity for the application of agricultural and industrial science and the direction of business into the safest channels.

Consider a few figures. Between 1925 and 1928, world wheat production increased 13 per cent., but in that same period Canadian wheat production increased 35 per cent. Coarse grains production increased in Canada 21 per cent., as compared with a world increase of only 5 per cent. Coal production—world increase, 5 per cent., Canada, 33 per cent. Oil production—world increase, 24 per cent., Canada, 88 per cent. Lead production—world increase, 11 per cent., Canada 32 per cent. Copper production—world increase 18 per cent., Canada, 81 per cent. Pig iron production—world increase, 14 per cent., Canada 81 per cent. Steel production—world increase, 20 per cent., Canada 63 per cent. Automobile production—world increase, 7 per cent., Canada 66 per cent. Paper production—world increase 9 per cent., Canada, 31 per cent. Aluminum production—world increase 15 per cent., Canada, 125 per cent. Artificial silk—world increase, 103 per cent., Canada, 217 per cent. Water power developed—world increase, 17 per cent., Canada, 43 per cent. Foreign trade (value), world increase, 3 per cent., Canada, 26 per cent.

The foregoing cannot, of course, be accepted as a complete registration of the world's economic activity, nor should it be regarded as painting a picture of unalloyed prosperity; perhaps it goes without saying that the world has not yet reached that ideal state where the work of all its people can be accurately recorded, and where this work will be in such perfect form that none shall struggle against difficulties or suffer distress.

In the current year we see the aftermath of some misdirected economic effort, and of the greatest speculative boom in history. But, whatever the actual demand is today, the world's needs must eventually go on increasing, and its present great productive capacity will be called into active play when the present period of unsettlement is over and the stage is again set for prosperity. As for Canada, her imposing record of progress achieved in the brief space of the last four or five years gives but a hint of her potential power, and of the position which, by the development of her natural wealth, she can take when world progress is resumed.

Heat and Sound Insulation
Diatomite is a light fluffy material composed of the minute siliceous skeletons of diatoms, and is used in industry as an insulator against heat and sound, for filtering, and as an admixture in concret and plasters. The Dominion has a large number of diatomite deposits in British Columbia, Ontario and the Maritimes.

Minard's for Insect Bites,

Tribute To Dr. Eckener

People Take Visits Of Graf Zeppelin As Matter Of Course

A writer in the New York Evening World says: "It is interesting, as showing what has happened with regard to this 'air-mindedness' that is so often spoken about, that the Graf Zeppelin, fighting the worst weather that it has ever encountered, caused the smallest stir by its arrival here that it ever caused. People now take it for granted that it will arrive safely and sail safely on schedule, just as they take it for granted that the 'Europa' will arrive and depart safely and on schedule, or the 'Bremen,' or the 'Berengaria.' She has become, in the minds of the American people, a sort of aerial liner, a little more exciting, no doubt, than an ocean liner, but in pretty much the same class. Dr. Eckener, then, if he is a reflective man, will realize that this matter-of-fact acceptance of his presence was perhaps the highest tribute to him and to his ship that could be paid. People no longer wonder about the Graf Zeppelin, but realize that regular air transport over the Atlantic is now a reality."

Some credit to Mr. Hoover as a prophet, it seems to us, is due in this connection too. It will be recalled that quite casually, before any of us had ever seen the Graf Zeppelin, he said that regular airship travel across the Atlantic would come in a few months. Well, here it is.

PALE FACES JADED NERVES

Due To Weak, Watery Blood

Anaemia—impoverished blood—comes so stealthily that it is often well advanced before recognized. Fatigue and discomfort the earliest manifestations of the trouble are seldom taken seriously. Soon the face becomes pale; the nerves jaded; the heart palpitates violently after the slightest exertion; the appetite becomes fickle and before you realize it you are in a terrible plight.

At such time, by enriching and purifying the blood Dr. Williams' Pink Pills will build up the nerve cells and correct the run-down condition. Concerning them Miss Margaret Torrey, Toronto, Ont., says:—"I suffered a complete breakdown. My heart would palpitate on the least exertion. Nothing I ate agreed with me. I started taking Dr. Williams' Pink Pills and by the time I had taken several boxes I was ready for anything; I had gained in weight and every distressing symptom had left me."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

British Columbia Head Lettuce

Head lettuce is moving from the Armstrong fields, and it is said that the acreage will provide shipments totalling between 30 and 40 cars; the movement being greater this year than last.

Persian Balm creates lovely complexions. Velvety smooth. Cools and relieves the skin. Makes it delightfully soft-textured. Alluringly fragrant. Delightful to use. Swiftly absorbed by the tissues, imparting that elusive charm so distinctive of the dainty woman. Persian Balm protects the delicate skin. Preserves and enhances the loveliest complexion. Every discriminating woman should use this silvery lotion. It is unrivalled as a flawless aid to beauty.

Most Costly Lightning Stroke

The costliest lightning stroke known was that which struck the U.S. Naval Ammunition Depot at Lake Denmark, N.J., in 1926, resulting in the loss of 31 lives and damage amounting to \$93,000,000.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

And Sixty Days

There is a story about a man who lay down among the victims of a train wreck that he might claim damages, and now Glasgow reports a man who was hurt in a fight and was taken to the hospital along with those hurt in a tramway accident. He got £10 damages from the company and 60 days in jail when the fraud was discovered.

Use Minard's for Rheumatism.

English Language Spreading

American Books Have Extensive Market In Foreign Countries

The wide and growing prevalence of the English language is attested by the fact that countries to which our tongue is that of a foreigner take high rank among the purchasers of books published in the United States. The Department of Commerce supplies the information that American books have an extensive market in foreign countries. While naturally the United Kingdom and Canada supply the largest number of readers, the country that stands third in the purchase of books made in the United States is China. Latin America and the Philippines take large numbers. That the third best customer for books printed in the English language is China shows how widely the English language is spreading, and with it, of course, Anglo-Saxon culture.

Asthma Can Be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

New Baby Auto

Automobile Being Made To Sell At \$200 In United States

It is stated that General Motors have under construction a small four-cylinder automobile along the lines of the English Austin, which will retail in the United States at around \$200. Patterns are being made in Detroit for the new radical design, which is expected to greatly extend the ownership range of the automobile, and to boost business, which has fallen off seriously in the higher-priced models. Details of the new motor car are being jealously guarded.

Minard's Drives Away the Headache.

Speed Boat Shipped

British Girl Has Entered Craft For International Trophy

"Estelle V.," the motor boat with which Betty Carstairs hopes to establish a new record at Detroit, was shipped from England on the White Star liner "Calgaric," accompanied by five mechanics. From Halifax the boat will be shipped by Canadian National Railways to Gravenhurst, Ontario, where it will be tuned up in the Muskoka Lakes before the Detroit races.

As a result of Major Segrave's death, Miss Carstairs will be the only British entrant for the international trophy.

OPEN SORES

HEAL IN QUICKEST TIME KNOWN
"Sores on leg, ulcers, for months. Doctors failed to heal. Then 'Sootha-Salva' healed them in few days." Jules Simard. "Sootha-Salva" heals sores, ulcers, boils, burns, scalds, eczema, like magic. All druggists.

Coal Movement Arranged

Everything Ready For Shipments From Alberta and Saskatchewan Into Manitoba

All administrative arrangements in connection with the movement of Alberta and Saskatchewan coal into the Manitoba market under the recently granted subvention to aid in the ousting of imported fuel, are now completed, it was stated by Frank G. Neate, secretary of the Dominion Fuel Board, Ottawa. Mr. Neate was in conference, at Winnipeg, with operators from Alberta and Saskatchewan and also with distributors and railway officials.

"The machinery is all set up to handle the administrative work, the co-operation of the railways has been secured and the operators and distributors understand what is required of them," said Mr. Neate. "With the weapon now in their hands with which to combat the importation of foreign coal, it now is up to the coal people to use it."

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

After 62 years of waiting the congregation of St. Michael and All Angels' Church, Helensburg, Scotland, have just decided to complete the erection of the uncompleted church tower.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

There is probably no other modern development of astronomy that has so revolutionized the science as the application of photography.

CHAPTER XVIII.—Continued.

The doctor chuckled, glanced shrewdly at his companion, and replied: "I don't imagine that those rides were a real sacrifice to my assistant!"

"If they were," retorted Charmian with a dimple, "he disguised the fact with proper gallantry; but I'm none the less grateful to him. It's a long walk to District Four when the mercury hovers around zero, Doctor; and Grandma worries."

"I wish you didn't have to leave her, Charmian. The days must seem long now that winter has set in."

"I fear they seem a great deal longer than she admits," replied the girl. "Grandma's so patient and uncomplaining. But I can't give up the school, Doctor, even with the welcome board money coming in each week. I know we're foolish to cling to the old house the way we do. I might, in the name of common sense, be willing to part with it and break my heart, but I can't break Grandma's; and no other home would seem her own."

The old man was silent for a moment, and then said: "George K. tells me the house is really yours, Charmian."

"It is. I thought you knew that Grandma deeded it to me a year ago. She got the idea that it might save trouble for me after she goes; and I let her do it because it made her happier."

They rode half a mile in friendly silence. It was beginning to snow, the big flakes drifting down lazily and settling on the windshield.

"I've been thinking," said the doctor at last. "I can't help worrying about you, child, because I know, you see, that I shan't always be on hand to advise you when you may need advice. An idea came to me in the

night, an idea that might not suggest itself to you, and I'm telling you now so that if the time comes when you must part with the old homestead, you could consider it. It's this: If you sell the place, don't part with your great-grandfather's little office. You could live there comfortably, you and Grandma. With a kitchen and bathroom added at the back it would make a cozy enough home; and it would be home, in a way, to both of you. Don't forget it, child, if I'm not here to remind you."

"But you will be! I won't admit anything can ever take you from us, Doctor Howe—we need you so. But I'll remember your suggestion. It's a good one, only—what would your young M.D. do for an office?"

"That point," answered the doctor, "will take care of itself."

Another moment of stillness followed; then he said, briskly, as if making a decision, "I think I'll confide in you, Charmian. You know, of course, that I haven't saved much money. I've had nothing to save for; and I've done my work for the work's sake, and the love I have for my loyal patients. I've kept my house in repair and paid my bills, and, providing there was enough for that, I haven't hounded folks if they paid slowly, or even if they didn't pay at all. So you see, child, I'm no John D.!"

"I see," said the girl, wondering where this confidence was leading.

"I wonder how much John Carter has told you about his life," said the old man unexpectedly.

"Very little," replied Charmian, still puzzled.

"Possibly then, you don't know that as a boy he had almost everything he desired. His people were wealthy, and John and his sister might easily have been spoiled. They went to exclusive schools, and later mingled with what society calls 'the best,' meaning, I suppose, the most stylish. John had always wanted to be a doctor, but he wasn't strong and his father, knowing it to be a hard life, objected. The boy persisted, however, and after graduating from Harvard went into Medical School. In his second year there, his father died—a shock caused by financial worry. Though no one had guessed it, things had been going badly with his business. There was enough left to pay his creditors and save a few of the family heirlooms, nothing more. Two weeks later John's mother died in her sleep."

"Oh, that poor boy!" broke in Charmian with compassion.

"Poor boy, indeed," went on the doctor, "for he loved both parents dearly. The sister, fortunately, had married well. John made his home with her, and went on studying—earning his own way—working too hard, and risking his not too robust health. That was his reason, my dear, for taking a country practice. He needs fresh air, and to get away from persistent invitations that would mean late hours. There are enough late hours in the life of the average doctor, without adding to them in society."

"He will certainly escape society in Wickfield!" smiled Charmian.

"Which is what he wants, and what brings me back to my starting point," the old man continued. "The boy is doing well. The Wickfield people like and respect him. He understands them, and takes hold as I'd hoped he would. So, though of course he doesn't guess it, when my time comes, Charmian, he will inherit what little I have to leave: a roof over his head; an office that folks are used to coming to; and the trust of my friends and patients. So you needn't worry about leaving him without an office if you and Grandma decide to make the change. He'll be provided for. All he needs is a good wife; and I'm wondering, . . ."

The doctor paused, turning to look at Charmian so intently that her color rose.

"There are photographs of two perfect peaches on his bureau, and, according to Grandma, another in his watch!" she retorted lightly.

"And what is there in his heart, my dear?" asked the old man.

"How should I know?"

"Well," said the doctor, shaking his head, "if a red-blooded young fellow can live under the same roof with Charmian Davis, and not find something in his heart, I am mistaken. He should have been on his knees to her before this."

Charmian laughed as she responded: "I understand that they don't do it that way these days! And I've

been told that a doctor's wife has a hard life."

"I think you could stand it," smiled her old friend. "I shouldn't want the lad to live alone, Charmian, as I have. He's like a son to me."

She ventured a little laugh.

"I believe that I regard him that way myself! It's a pleasure to keep his meals hot—he's so grateful."

"I'd rather you regarded him differently," said the doctor, sighing, "that is, unless—Dear me! Here we are at my destination. The widow Smithson has got the grippe, I shan't be long, child."

The girl glanced up, suddenly conscious of her surroundings. They had stopped before the small, brown, shabby cottage where Jim Bennett had once collected interest money—the place where Charmian had called him "Shylock."

CHAPTER XIX.

As the doctor went within, Charmian's thoughts drifted back to that ride with Jim—to all the changes that had come since, and to those that were destined to come before many years. The old man's confidence had stirred her deeply. He was younger than her grandmother, but he had lived a harder life and was breaking earlier. Probably he knew more about his condition than he had told her. The end might be nearer than it seemed; and he was "putting his house in order." It was like him to be ready when the call came; and to plan so that his care for her welfare went even beyond the grave.

Charmian shivered, not from cold, but from a sense of what life would be to her when all these natural changes had taken place. Even Grandma, happy as she was, could not go on for ever. What would there be for her in Wickfield without Grandma, the old doctor, and even Jim? There was John Carter, to be sure. Perhaps . . .

The girl's lovely color deepened just a trifle at the thought of where this reverie was leading. Then a child's fretful cry from within the cottage brought her back to the scene before her. The house seemed even shabbier than she remembered it—cold and uncomfortable in its wintry setting. A broken windowpane was stuffed with an old shawl. The shades at the windows were torn and sagging. What would such people do without a kindly counsellor like Doctor Howe? Would his successor be as lenient to unpaid bills—or would he collect relentlessly, as Jim Bennett had collected that interest for the bank?

No, Charmian's heart answered, John Carter would not be an inhuman creditor. There was a warm kindli-

ness about him that precluded such a thought. But, spoke up a loyal voice within her, Jim was kind also. Only in business . . . Did all business men care less about the human side of life? . . . Did days spent thinking in terms of money, blind one after a time to other needs?

She stirred at the door of the cottage opened and closed on her old friend; but he came to her side of the car and asked a question:

"Have you got Jim Bennett's address on the tip of your tongue, child? I can't remember it."

(To Be Continued.)

STURDY CHILDHOOD

The sturdy child—the bright, active little chap is the one everybody loves. It is only the sickly, fretful child who is not attractive. It is the birthright of every child to be sturdy and well—to be able to make every one admire him. Therefore, mothers, if yours is not attractive it's your fault, not his. He must be ailing and it is up to you to see that he gets relief—that he is given a medicine that will quickly make him well and keep him well.

Baby's Own Tablets are especially designed for infants and young children. There is nothing to equal them for correcting the irregularities of the stomach and bowels—the cause of most of the ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Chinese telephone exchange of San Francisco, Calif., has 2,300 subscribers; two of the operators have served for 20 years.

Keep Douglas' Egyptian Liniment handy. A sure, speedy remedy for burns, sprains, felons, blood poisoning, soft corns, warts, scald feet. Invaluable for inflammation and muscular rheumatism.

Preference For Blacks

A sheep slayer that attacks only the black sheep in the flock is reported from Cheyenne, Wyoming. This freak killer went through a flock and killed seven black sheep in one night, but failed to touch a single white one.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as the termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Little Helps For This Week

"The Lord shall be unto thee an everlasting light."—Isaiah ix. 19.

There is no day so dark But through the murk some ray of hope may steal, Some blessed touch from Heaven that we might feel If we but choose to mark.

—Celia Thaxter.

Let us all be sure that all is well, whatever comes, while we trust and stand fast and strive, and only hopeless— and rightly hopeless—when we want what we are in no wise willing to earn. The glory and the glow of life come by right living. So then, while we may not know what trials wait on any of us, we can believe that as the days in which Job wrestled with his dark maladies are the only days that make him worth remembrance, and but for which his name had never been written in the Book of Life; so the days through which we struggle, finding no way, but never losing the light, will be the most significant we are called to live.—Robert Collier.

Minard's for Falling Hair.

Again Break Records

Homestead filings at the Edmonton land office have again shattered all records. During April 529 homesteads and 19 soldier grants were taken up. The preceding April exceeded any previous month with 349 homesteads and 8 soldier grants.

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl chum told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

CANADIAN AGRICULTURAL
CONDITIONS

(Continued from page 4)

conditions have improved the outlook for fall wheat in Ontario, and the yield is now estimated at 60 per cent of normal. Spring grains look well and pastures are in good condition. Seeding on low-lying lands in Quebec was delayed by rains, but grains and vegetables sown earlier have grown rapidly. In the Maritime Provinces, seeding was completed unusually early, and a larger acreage is reported for all crops, especially in Nova Scotia. An early survey of the principal potato growing areas of Canada indicates that plantings have increased approximately 8 per cent with all sections showing in the increase. This development is most marked in the Lower Provinces and it is estimated that an increase of 15 per cent will be shown in Prince Edward Island.

Crops in British Columbia are approximately ten days later than last year, but the outlook for a large yield is promising. Frosts during May injured strawberries, tomatoes, potatoes and other tender plants. Replanting of almost all areas was completed early in June, however, and while the harvest will be delayed, little decrease in output is anticipated.

Fruit crop prospects are encouraging in all parts of Canada and it is anticipated that the total yield will approximate that of 1929. The Department of Agriculture has issued a tentative estimate that the Apple crop will be equal to, or slightly heavier than the five-year average. Present conditions of cherries, plums, peaches, pears and grapes indicate increases over last year's yield, ranging from 9 per cent in cherries to 34 per cent in plums. Strawberries and raspberries have been affected by drought and winter kill and the yield will be reduced approximately 10 per cent. An increased production of cantaloupes is indicated.

There has been a significant growth in the vegetable canning industry of Ontario and British Columbia. The latest news of importance to this industry is the increase of 30 per cent in the acreage planted to tomatoes. An increase is also reported in Quebec. Approximately 80 per cent of the tomatoes grown in Canada are sold under contract to canning factories. In southwestern Ontario the production of beans for canning purposes is an important branch of agriculture; the acreage planted this spring is reported to be at least as large as that of last season.

In its five years of operation as a subsidiary of the department of colonization and development, Canadian Pacific Railway, the Canada Colonization Association has placed 4,225 families on 836,000 acres of land in western Canada. Colonel J. S. Dennis, president of the association, submitted to its directors at Winnipeg recently. The association has at present opportunities to settle 1,507 families on 332,596 acres in the prairie provinces.

Cash prizes exceeding \$200,000 will be offered at the World's Grain Exhibition and Conference to be held at Regina, August 1-13, 1932. The major prizes totalling \$70,000 will be for wheat. It is aimed to have field tests to verify the purity of the grain and also to have milling and chemical tests to establish quality.

Immigration to Canada during the six months, April 1 to September 29, 1929, totalled 120,338, of which 51,781 were British; 20,709 from the United States; 21,891 from north-western Europe, and 25,957 representing 33 other races. Total immigration same period of 1928 was 123,713.

Official opening of the enlarged Empress Hotel at Victoria to which a huge addition has recently been completed at a cost of approximately \$3,000,000 will be held December 21, it is announced by H. F. Mathews, general manager of Western Canadian Pacific Hotels.

Gold produced in Ontario in the first nine months of 1929 had a value of \$24,735,562, or in excess of a million dollars over value of production in first nine months of 1928.

Breaking all previous records for handling of Japanese oranges, a special Canadian Pacific Railway train consisting of 22 cars of the Oriental fruit, arrived at Winnipeg recently about 60 hours after leaving the coast, in time for the first Yuletide oranges to be on the market. The whole consignment from the coast consisted of 69 box cars holding a total of 8,250,000 of the Japanese delicacy.

About 2,809,000 fry and 240,000 eyed eggs, a total of 3,049,000 prospective fish, was the record output of the Banff hatchery this past season. The eggs were conveyed with difficulty by pack horse to the Bear Creek Valley watershed of Lake Louise. The fry were widely distributed over western areas.

Statistics show an increase of 1,036 vessel arrivals in the Port of Vancouver for the first nine months of this year above the number for the same period last year. Net tonnage shows an increase of 251,648 tons inward while outward tonnage shows a corresponding increase. Gain in arrivals was made up by 22 more deep-sea vessels; 22 foreign coastwise; and 492 more local coastwise.

The Rockies Are Calling You

The combination of the extremes of natural and sophisticated at Banff Springs Hotel and Chateau Lake Louise, which open May 15 and June 1, respectively, until September 30, is perhaps the secret of their charm. Located in the heart of the finest scenery of the continent—mountain, lake and forest—each offers to the visitor everything that the most ritzy hotel in the most cosmopolitan cities of the world can furnish. You may cut dancing to look through huge windows at slices of billion-dollar scenery or you may attire yourself to please yourself and go out for days on horseback into territory virtually untouched by the

white man and all within a few miles of either hotel. You may live plainly but well on food packed into the wilds by horse or you may dine on exotic dainties drawn from the ends of the earth. You may be strictly formal or you may wander around in plus fours—everything goes, whether you are admiring the moonlight on snow-crowned peaks or listening at your ease to a cosmopolitan dance orchestra playing the latest blue. Anyone visiting either of these hotels has laid in a memory that will last a lifetime. Lay-out shows, left, view from Chateau Lake Louise; lower right, the Banff Springs Hotel.

PLANS APPROVED FOR AN EMPIRE NEWS SERVICE

London, Eng.—By an almost unanimous vote the Imperial Press conference placed its seal of approval on the resolution which was proposed by E. Norman Smith, of the Ottawa Journal, that "this conference approves the principle of mutual and co-operative interchange of cable news between the component parts of the Empire."

Subsequently B. C. Nicholas, of the Victoria Times, moved a further resolution that the communications committee be authorized to investigate and report upon the feasibility for co-operative news distribution for the Empire. The purpose of this resolution, Mr. Nicholas explained briefly, was to translate the conference decision into practical fact. There was considerable opposition to the Nicholas resolution, however, and Mr. Nicholas did not press it.

During the morning's discussion, J. B. F. Livesay, general manager of the Canadian Press, a delegate, submitted a tentative scheme for the creation of a British Empire Press Association. The scheme suggests the establishment of national co-operative news service, similar to the Canadian Press, in the various units of the Empire, with a central office in London, through which the national units could exchange Empire news. The association, suggested Mr. Livesay, should be "mutual and co-operative from crown to base, girdling the world with a news service owned and controlled by the newspapers of the British Empire."

C. F. Crandall, of the British United Press, Montreal, pressed the need for individuality in news service. The Hon. Theodore Fink, chairman of the Australian section, approved of the principle of the news interchange but was not prepared to proceed at once with consideration of a definite scheme. K. C. Roy, of India, doubted if the creation of a co-operative news service, such as that suggested by Mr. Livesay, would be possible in India.

Victor Sifton, The Leader-Post, Regina; J. W. Daffoe, Manitoba Free Press, Winnipeg, and W. Rupert Davies, the Whig-Standard, Kingston, Ont., emphasized the advantages of co-operative service as exemplified by the Canadian Press.

The Canadian Press despatches, said Mr. Sifton, were accurate and impartial. Mr. Daffoe observed that Canada had every possible diversity of views; co-operative news gathering had been tested in Canada and found satisfactory. It did not destroy individuality as a newspaper could have its own special correspondents or take other services. But every political question had its hard core of actual fact and it was this core of fact which the Canadian Press presented.

"It is an enormous relief to me in my office," said the noted Winnipeg editor, "to know that there is the Canadian Press to give me the essential facts on every question. If I wish to embroider them that is my privilege."

Mr. Davies said that as a result of the formation of the Canadian Press the smaller Canadian newspapers were enabled to give their readers a first-class service.

T. C. List, of New Zealand, pointed out the advantages secured by New Zealand by the establishment of a co-operative news service there. A similar system for all parts of the Empire would be all to the good. Allan Powers, Australia, and G. A. L. Green, South Africa, both doubted the immediate expedience of an Empire co-operative service. R. J. Kingston Russell, South Africa, supported the idea.

In further discussion, Lord Burnham observed that the Canadian case was unanswerable, but suggested postponement of the resolution until the next Imperial Press Conference. J. H. Woods, managing director of the Calgary Herald, then replied that the Canadian delegation was a unit in support of Mr. Norman Smith's resolution approving the principle of co-operative interchange of news. He

urged that the matter should not be postponed.

The conference then voted on the question and the Canadian resolution passed with very few dissenters.

Southern Cross Spans Atlantic

Australian Airman Makes Westward Flight In 31 Hours and 35 Minutes

Harbor Grace, Nfld.—Baffled by fog thick as soup and more dangerous than buffeting winds, the Southern Cross, veteran of the air, paused here, 1,100 miles short of New York, and the goal aspired to by Captain Charles E. Kingsford-Smith, daring Australian airman, and his three companions.

The trim silver monoplane, its three motors roaring through the night, spanned the North Atlantic in 31 hours and 35 minutes, and, having flown the 2,190 miles from Port Marnock on the Irish coast, settled out of the morning mists here at 6 a.m., E.S.T.

They had four gallons of gasoline left when they landed, after having flown about for hours lost in the darkness and impenetrable fog. At one time, the Southern Cross was reported past Cape Race, on the southeastern tip of this promontory of the continent. They actually flew several hundred miles farther than the airline distance from Ireland to Newfoundland.

It was Captain Kingsford-Smith, the commander, who revealed that the gasoline nearly gave out.

"The Southern Cross, which had flown over all oceans but the Atlantic, had less than four gallons of gasoline when we landed," he told the United Press. "We were becoming discouraged, seeing nothing but unbroken country below."

"For the first ten hours out across the sea, the weather was moderate," Captain J. Patrick Saul, the Irish navigator, told the United Press. "But visibility was bad, and it got worse."

Large Attendance Of Tourists At Celebration

Iceland Is Entertaining Visitors From Many Nations

Reykjavik, Iceland.—Hundreds of tourists from Canada, the United States and Europe have swarmed into Iceland on ocean liners of various nationalities. The harbor is filled with celebration of Iceland's 1,000th parliamentary anniversary.

The visitors will use their ships as hotels during their stay because Reykjavik was brimful of celebrants before their arrival.

Motor car traffic in the streets compared with that of any metropolis, is in striking contrast to the usual quiet. Reykjavik was so full of visitors that hundreds already had taken recourse to a tent on the Tingvellir plain.

Traffic Problems Discussed

Canadian Good Roads Association Holds Convention In Toronto

Toronto.—Realization of a coast to coast highway across Canada, uniformity of traffic laws and signs in the provinces, elimination of level railway crossings and regulation of aeroplanes were the topics of discussion at a conference of delegates from all provinces which was held here under the auspices of the Canadian Good Roads Association.

Among the delegates were Hon. Frank Oliver, advisory officer to the Dominion Railway Board, and Hon. W. R. Clubb, Manitoba Minister of Public Works.

Twenty-Seven Planes Burn

Fire Caused By Explosion In Chicago Hangar

Chicago, Ill.—Two hangars and 27 aeroplanes, 12 of them tri-motor passenger planes, were destroyed by fire at the municipal airport. The loss was estimated at more than two million dollars.

The hangars destroyed were those of the Universal Air Lines Inc., and the Grey Goose Air Lines, the latter under lease to the Stout Air Lines. The fire followed an explosion of undetermined cause in the Universal hangar.

WAR VETERANS' ALLOWANCE

Daniel Lesok, totally disabled war veteran, who will be first to get war veterans' allowance when new act goes into force September 1.

Unloading Surplus Wheat

Canadian Visible Supply Of Wheat Is Decreasing Rapidly

Montreal, Que.—"During the five weeks ended June 6, the Canadian visible supply of wheat decreased by more than 35,000,000 bushels," says the Monthly Business Review of the Royal Bank of Canada. "If the movement of Canadian wheat continues at this rate until the end of July, the carrying over into the new crop year will be less than 100,000,000 bushels. In the face of foreign estimates that the carry-over would exceed that figure by 50 per cent., the recent movements may be considered good news."

The review comments upon excellent growth of early sown grains in Eastern Canada and improved prospects for fall wheat in Ontario.

Crops in British Columbia are approximately 10 days later than last year, but the outlook for a large yield is promising.

New Zealand Requires Canadian Engineer

Services Of Outstanding Man Needed To Repair Power Plant

Wellington, New Zealand.—Services of an "outstanding Canadian engineer" are required by New Zealand. The government has cabled its trade commissioner in Canada asking that he secure such a man. The "job" is that of effecting repairs to the recently completed Arapuni power plant. Canada's great strides in the science of building and maintaining such power plants is largely responsible for the fact that a Canadian is wanted.

Manufacturing More Butter

Winnipeg, Man.—Manufacture of creamery butter in Manitoba continues to increase rapidly, according to a report from the Department of Agriculture. The make for May, it is stated, was 20½ per cent. greater than of May, 1929.

Federal Aid For Highways

Canadian Good Roads Association Will Urge This Matter

Toronto.—Federal aid for main highways, provincial as well as inter-provincial, will be urged on the Dominion Government by the executive of the Canadian Good Roads Association, it was decided here at a conference between that body and representatives of the Ontario, Quebec, Manitoba, Saskatchewan and New Brunswick governments, the railways, the Dominion Railway Board and other bodies.

The executive will also draw up a proposed schedule of uniform traffic regulations, which it is hoped all provinces will adopt. This code will cover a speed limit, lighting and brake equipment, and registration fees.

A plea for federal aid for highways in Northern Ontario was made by Hon. William Finlayson, minister for lands and forests for Ontario. Mr. Finlayson declared that these highways would be a valuable link in a national chain, but that the area through which they extended was very sparsely populated at present, and that unless the Dominion contributed towards the cost, the whole burden would fall on Old Ontario.

Report On Manitoba Grain Fields Encouraging

Crop Summary Issued By Department Of Agriculture

Winnipeg, Man.—Grain fields in Manitoba look "very well," by virtue of satisfactory growth during the last few weeks and despite slow May growth and cold spring weather, according to a crop summary issued by the Manitoba Department of Agriculture. Early-sown wheat is reported in the shot-blade and fall rye has been headed two weeks or more.

In most places, moisture requirements have been met, though slough-water is not plentiful due to drought of one year ago. Soil drifting has been pretty well outgrown, though it was quite prevalent a short time ago in central Manitoba. The few hailstorms recorded in the province have done considerable local damage.

Cut-worm damage on the whole has been slight, it is stated, and the season for their activity will soon be over. Hay prospects are fair to good and while tame-grass and clover acreage is below average, the growth is fair. Animals have been doing well the past month.

Amendment Given First Reading

London, Eng.—Recent agreements between the Dominion Government and the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, regarding the natural resources of the respective provinces, had an echo in the House of Lords when first reading was given to an amendment to the British North America Act, designed to give effect to the agreement.

UNITED STATES IS WORRIED OVER GRAIN SITUATION

Washington.—Political and official Washington is watching the slumping prices of grain and cotton closely these days.

Two Democratic senators from Texas and Oklahoma states which produce both crops, called the senate's attention to the record lows recently, connecting the price drops with the new tariff bill.

The Oklahoman, Senator Thomas, made a novel proposal for dealing with the world market which fixes most American farm prices. He introduced a resolution to authorize the president to call an international conference to solve economic barriers, consider a system of international crop reporting and study a plan for control of production of exportable agricultural products.

At the Farm Board, Chairman Legge stuck close to his position that the time has not yet come to act, because the farmers have not put their 1930 crops on the market yet. That time is perilously close, however, and in the southwest marketing of grain has already begun.

Arrangements made during the past year, however, put the boards in shape to act quickly when the time comes, and funds already on hand of the board's first quarter million appropriation can be supplemented by money which Legge is able to borrow, if needed, from private banks at the prevailing low money rates.

The board intends to market 300,000,000 bushels of grain of the new crop and to lend money to enable farmers to hold their grain if the price at harvest time is too low. The board believes that money is available to handle this, and consequently the \$250,000,000 authorized but not yet appropriated may not be needed. The government's expected deficit next year is also a factor to be considered in seeking farm appropriations.

The board had no comment to make on the telegraphed request of Governor Reed, of Kansas, for immediate action to bolster the price of grain.

Britain's Naval Program

Program For 1930 Includes Three Six-Inch Gun Cruisers

London, England.—Rt. Hon. A. V. Alexander, first lord of the admiralty, told the House of Commons that supplementary estimates in the government's 1930 naval construction program would be presented shortly for three 6-inch gun cruisers, nine destroyers, three submarines, four sloops and one net-layer and target-towing vessel. They would cost about £9,000,000.

The first lord said orders for laying down these vessels would not be given until the last quarter of this financial year, and that only a small sum would be required to be spent on the vessels specified.

"I would emphasize," remarked Mr. Alexander, "that these ships are required in replacement of others which have passed the age limit and to enable the royal navy to carry out its current duties in time of peace and that the program has no relation to those of other powers."

General Election For Britain

Ramsay MacDonald States Labor Party May Go To Country In The Fall

London, England.—The possibility that a general election might be necessary before fall was expressed by the Prime Minister J. Ramsay MacDonald, at a meeting of the Labor Party here.

The Prime Minister made the statement in explaining his action in commons earlier in the day, when he announced the government was dropping the education bill and the consumers' council bill for the balance of the present session.

MacDonald said that in view of the likelihood of a general election before autumn, it was not desirable to face the contest "with the decks littered with lumber."

When East Met West

Kipling claims in a famous poem that East is one thing and West something else again, and "never the twain shall meet," but this dictum is nullified by the quaint snapshot, reproduced above, of eight-year-old Milly Chan, little Chinese brunette, and Pauline Nancollis, 3½, curly-haired English tot, looking through the same life belt aboard S.S. Empress of Asia. Milly "adopted" Pauline during the ten-day voyage of the Canadian Pacific liner from Yokohama to Vancouver. They were the only youngsters among the first-class passengers on the trip.

DUPLEX OPEN WHEEL PUMPING WINDMILL

In light winds the mill swivels easily as a weathervane. It is built especially for localities where severe wind storms predominate.

THE B. N. A. ACT

Giving a Sketch of the History of the Canadian Constitution

"Can you tell me briefly something of the British North America Act?" writes a correspondent. It is a pertinent question, as daily we see it quoted.

The original Dominion of Canada, formed July 1, 1867, by the British North America Act, was composed of four provinces, Ontario, Quebec, Nova Scotia and New Brunswick. Manitoba became the fifth province in 1870; In 1871 British Columbia became the sixth; in 1873 Prince Edward Island became the seventh; in 1905 Alberta and Saskatchewan became the eighth and ninth provinces; Yukon became a territory in 1898 and all the rest of Canada is "The North-West Territories." The British North America Act may be termed the "written constitution" of Canada, although in Canada there is much that is unwritten in that constitution which has been defined as "the totality of the principles more or less vaguely and generally stated upon which we think the people should be governed."

There is no provision in the B.N.A. Act for amendments thereto, the reason being that when the provinces of Lower and Upper Canada were united in 1841 into the province of Canada, the old Lower Province was largely populated by French-Canadians almost all of whom were Roman Catholics and much attached to their old laws and customs; the remainder of the people of the new dominion were largely English-speaking and Protestant, in general attached to English law and customs. While the French Canadians were willing to enter into a contract with their English-speaking brethren, they were not willing to enter into a contract which could be varied by the more English without their consent.

Still there is no difficulty in having an amendment made when desired. It is brought about in this fashion: An address to the sovereign is passed by both houses of parliament at Ottawa asking for the amendment specified. The desired amendment to the B.N.A. Act is passed by the Imperial parliament as of course and without debate.

MILLIONAIRES

There are almost five hundred persons in the United States whose annual income was one million dollars last year. The Government will not supply the names of these millionaires.

Printers will be surprised to learn that two hundred of these persons are owners of machine composing plants.

It is a far cry from this condition to the days when the printer was a poor man of the neighborhood. Our readers will recall the instances of the printer who went to the local bank president for a loan.

The president lacked enthusiasm, but the printer was persistent. Finally the president turned to the printer and said: "One of my eyes is glass. If you tell me which one it is I will give you the loan." The printer looked intently for a minute and then announced, "It is the left one."

"How did you guess it?" asked the surprised president.

"Well," said the printer, "the left eye looked a little kinder than the other one."—Type Craft.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
